PART OF THE  modinex GROUP

The smart alternative to stone and timber panelling

Achieve the timeless elegance of stone or timber without the cost with Kerradeco.

Brilliantly engineered from 100% recyclable PVC with a natural finish, it's a sustainable, functional and stylish choice that offers unlimited design potential.

When you want a natural aesthetic and a surface with optimum durability without costing the world, Kerradeco is the answer.

The innovative interior panelling system possesses the highly desirable combination of functionality, sustainability and affordability, without an ounce of compromise on style or quality.

Manufactured using recycled PVC with an aluminium film finish, Kerradeco is lightweight, easy-to-install, easy-to-maintain and engineered to stand the test of time. And if style is your primary objective, the panelling's smooth, yet subtly textured finish and earthy tones faithfully reproduce the look of stone, timber, textiles and ceramics.

Kerradeco is perfect for contemporary residential and commercial interiors – new builds or renovations, offices, and retail spaces. This is where Kerradeco's versatility comes to the fore. Ideal for use as panelling for walls and partitions. Available in a range of on-trend colours, the panels can be used to create contrast within a space or between surface areas using complementary colours within the palette.

What's more is that the PVC and aluminium foil finish provide exceptional strength and resilience when compared to many of the alternative options including tiles, MDF boards, timber cladding or wallpaper. Crack, scratch and UV resistant, the Kerradeco is also moisture resistant and is tough enough to withstand high, direct impact.

Designed for simple, quick installation, Kerradeco is also a dream for builders and project managers. Pre-finished, it's installation-ready and with a concealed fix and fuss-free assembly using double-sided tape or glue, it can be on site and installed within a short space of time, cutting time and cost. Based on our experience, you'll have the panels up in less than half the time it would take to tile the area.

Ideal uses

A stylish, affordable and functional alternative to stone or timber, Kerradeco opens a world of opportunity for modern interior design.

- Interior wall
- Feature walls
- Partition walls
- Residential renovations
- Commercial renovations
- Small office fitouts
- Retail fitouts

There are so many reasons why Kerradeco is a smart choice

Natural aesthetics

A smooth yet subtly textured finish ideal for contemporary interiors that favour a natural aesthetic and neutral tones, and a focus on the use of sustainable materials.

Versatile

An interior panelling solution for commercial and residential spaces, it can be used for walls with the option to mix and match colours across surfaces.

Tough and practical

Crack and scratch resistant, fire rated and UV resistant, Kerradeco is functional and durable and comes with a 10 year warranty.

Moisture resistant

Made from PVC with an aluminium film finish, Kerradeco is water resistant. However, it is not suitable for heavy or direct water areas such as exterior surfaces, showers or kitchen splashbacks.

Fuss-free finish

Panels are pre-finished and installation-ready.

Fast installation

Lightweight with a concealed fix for quick assembly using double-sided tape or glue, rooms can be used immediately once Kerradeco has been installed.

Easy maintenance

Simply wipe the surface over with a cloth.

Mould and pest resistant

Kerradeco is fungi, rot and termite resistant.

Sustainable

Manufactured from recycled PVC and aluminium, the panelling is 100% recyclable.

Economic

Supplied and installed at a fraction of the cost of stone or ceramic tiles [no grouting required].

Kerradeco install time compared to wallpaper and ceramic tiles
